

Sample Questions for Periodic Test I
SE (Computer-C1,C2 and C3)

1. Explain Functions of OS.
2. What is an OS? Explain user mode and kernel mode with an example.
3. Explain Multiprogramming, Multithreading.
4. Differentiate between Multiprocessing and Multiprogramming.
5. What is a System call and also explain different types of System Calls.
6. Explain the concept of shell.
7. Explain types of thread and thread models.
8. With respect to process management, explain different types of queues with a neat diagram.
9. Differentiate between monolithic and micro kernel OS structure.
10. What is the process and explain the structure of PCB.
11. Draw and Explain 5 and 7 state process transition diagram. .
12. Explain 5 Process scheduling criteria.
13. Explain types of schedulers.
14. .Explain Fixed partitioning.
15. Explain Variable partitioning.
16. Explain Internal and External Fragmentation with an example.
17. Explain compaction with an example.
18. Explain the following scheduling policies with an example:
 - a. FCFS
 - b. SJF
 - c. SRTN / SRTF
 - d. Priority
 - e. Round Robin
19. Any Numerical problems on process scheduling policies.
20. Any Numerical problems on Best fit, Worst fit, First fit, Next fit.
21. Any Numerical problems on Paging.
22. Explain the process of Paging. How logical address is converted to physical address?
